

Carbon Reduction Plan Template

Supplier name:MASS Information Systems.....

Publication date: ...3rd February 2022.....

Commitment to achieving Net Zero

Mass Information Systems is committed to achieving Net Zero emissions by 2050.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2022	
Additional Details relating to the Baseline Emissions calculations.	
Baseline year emissions:	
EMISSIONS	TOTAL (tCO₂e)
Scope 1	Not yet assessed
Scope 2	Not yet assessed
Scope 3 (Included Sources)	Not yet assessed
Total Emissions	Not yet assessed

Current Emissions Reporting

Reporting Year: 20XX	
EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	Not yet assessed
Scope 2	Not yet assessed
Scope 3 (Included Sources)	Not yet assessed
Total Emissions	Not yet assessed

Emissions reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

We project that carbon emissions will decrease over the next five years to XX tCO₂e by 20XX. This is a reduction of XX%

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented since the 2022 baseline. The carbon emission reduction achieved by these schemes equate to XX tCO₂e, a XX%ge reduction against the 20XX baseline and the measures will be in effect when performing the contract. (To be assessed).

Mass Information Systems operate from a shared office hence are bound by the actions of the landlord to a degree.

We have implemented an increased working from home. From a baseline of mainly working in the office and on customer site, since 2020 we have switched to mainly working from home and mainly supporting clients remotely.

We have increased Cloud computing versus on-premise. We have moved our in-house server data to a Cloud platform, hence we are now sharing platforms with other organisations, lowering emissions.

In the future we hope to implement further measures such as:
Reduced office space due to hybrid/home working.

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard¹ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting².

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard³.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the Supplier:

.....
