

MCAULIFFE SITE SERVICES

CASE STUDY

INVENTORY HELPS MCAULIFFE SITE SERVICES TO **IMPROVE THEIR ASSET MANAGEMENT WITH AUDIT & COMPLIANCE.**

“

THE LAYOUT AND
FUNCTIONALITY OF
THE SYSTEM IS EASY TO
USE WHICH ENABLES
US TO GET THE JOB
DONE AS QUICK
AND EFFECTIVELY AS
POSSIBLE

”

InVentry helps McAuliffe Site Services to improve their Asset Management with Audit & Compliance.

THE CLIENT

McAuliffe Site Services, located in St Albans, London, pride themselves on delivering bespoke temporary solutions to the construction industry. Supplying equipment to construction companies for over 25 years, the organisation handles hundreds of assets on a regular basis.

THE CHALLENGE

The company needed a cost-effective solution with minimal disruption to their everyday work environment. With an asset tracking system already in place, McAuliffe Site Services were looking for a system with the capability to read and register 3rd party labels.

“

**WE WERE DELIGHTED
WITH INVENTRY'S QUICK
TURN OVER AND THE
SOFTWARE'S ABILITY TO
READ 3RD PARTY LABELS
WAS A BONUS**

”

THE SOLUTION

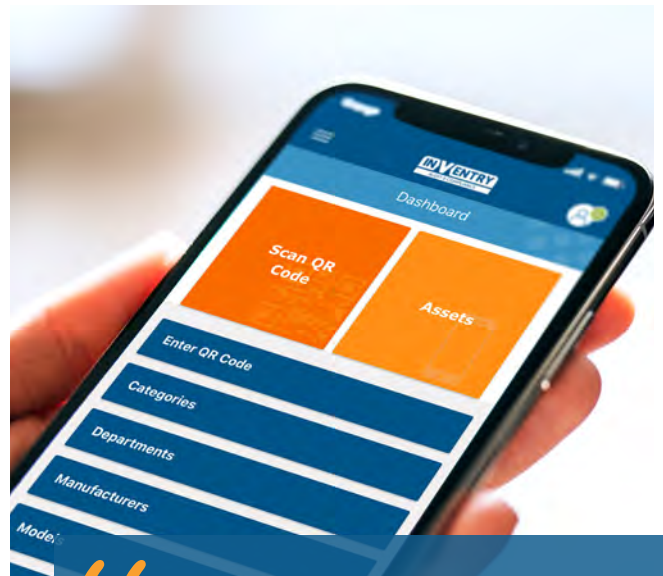

InVentry provided McAuliffe Site Services with a simple, yet effective solution to their asset management. With a quick turn around and minimal disruption to their clients, we were able to implement the InVentry system in as little as a couple of weeks.

This solution has allowed them to easily track their assets and conveniently locate which stock is both on and off their site, at all times. The ease of using the Audit & Compliance software on a portable device, has enabled the organisation to swiftly scan each asset as they're unloading their vehicles and their ability to sync this information via the cloud means they always have control over their asset management system. With regular planned software and programming updates, Audit & Compliance enables McAuliffe Site Services to develop and improve their own systems of working.

Nick Baugh, Procurement & Logistics Manager at McAuliffe Site Services said **"we were delighted with InVentry's quick turn over and the software's ability to read 3rd party labels was a bonus for us as it meant there was very little disruption for our clients. The ability to scan our assets via a mobile device is extremely important for our line of work and the ability to sync everything via the cloud has made deliveries to clients as simple as possible."**

The Audit & Compliance software has allowed the staff at McAuliffe Site Services to compile a thorough list of assets on various construction sites, whilst storing the temporary asset owner information accordingly.

Staff at the organisation said, **"The layout and functionality of the system is easy to use which enables us to get the job done as quick and effectively as possible. We're able to track every asset even when our products are across many different sites at any one time."**

“

THE ABILITY TO SCAN OUR ASSETS VIA A MOBILE DEVICE IS EXTREMELY IMPORTANT FOR OUR LINE OF WORK AND THE ABILITY TO SYNC EVERYTHING VIA THE CLOUD HAS MADE DELIVERIES TO CLIENTS AS SIMPLE AS POSSIBLE.
